REACTION™

REACTION™ is the latest release from E.T. Marketing. REACTION is a video card game completely different than any game of this type currently on the market. The major difference is that REACTION is a game of *skill*, not a game of chance!

REACTION is a two player game requiring ONE quarter for TWO players to play 1, 2, 3, or 5 hands of poker. *No* replays or points are awarded for winning. The game simply involves one player's skill against another's.

The cards are displayed on the screen with the backs of the cards facing the player. Skill is involved in two ways. First, when the 'deal' button is pushed, each card 'flips' through the entire deck at a rapid pace.

The player must attempt to stop the movement on the card he desires. This requires *physical reaction skill* as well as the *ability* to play the game smartly. The player continues through the 5 cards in this manner until he has a complete hand. Then, again using his *card playing skill* and *understanding*, he may 'hold' the cards he wishes to keep, discarding the others, and attempt to improve his hand in the same manner as before. The player with the best hand of cards is, of course, the winner. The winning hand is displayed and the game is over.

REACTION is a proven winner in cocktail lounge and tavern locations, and has been *approved* in states where other card games have been ruled illegal.
